NORTHFIELD HEALTH

Pediatric Febrile Infant Stratification

Document ID:	PEDS-FEVER-03
Version:	v1.4
Authority Tier:	Tier 4 - Institutional SOP
Document Type:	Pediatric ED SOP
Owner:	Dr. M. Vance, Pediatric Emergency Department
Approver:	Pediatrics Governance Committee
Department:	Pediatric Emergency Medicine
Effective Date:	July 17, 2024
Last Reviewed:	July 17, 2025
Next Review:	July 17, 2026 (OVERDUE)
Status:	Active - Review overdue

Section 1. Scope

This SOP describes how nursing and triage staff stratify infants who present with fever to the pediatric emergency department.

Section 3.1 Triage escalation

Any infant under 90 days of age with a measured temperature of 38.0 C or higher is escalated to the attending pediatrician immediately on arrival. Triage staff do not delay escalation to complete other assessments.

Section 3.2 Documentation

Triage staff record the temperature, the measurement site, the infant's age in days and the time the attending pediatrician was notified.

Section 3.3 Role of this SOP

This SOP covers triage and escalation only. Diagnostic work-up and treatment decisions are made by the attending pediatrician.
